What is claimed is:

1. Adhesive sheet comprising at least a backing and a layer of an adhesive, wherein the backing is in a mechanically stressed state.

5

- Adhesive sheet according to Claim 1, wherein the adhesive sheet further comprises a release liner whose mechanical stiffness is greater than that of the backing material.
- 3. Adhesive sheet according to Claim 1, wherein the mechanically stressed state is
 frozen in that the film has a resilience as a result of supply of energy.
 - 4. Adhesive sheet according to Claim 1, wherein a shrink film is used as backing material.
- 15 5. Adhesive sheet according to Claim 1, wherein the backing is coated on both sides with adhesive.
 - Adhesive sheet according to Claim 1, wherein at least one adhesive has an elastic resilience.

20

- 7. A process for producing punched products comprising punching the products from an adhesive sheet according to Claim 1.
- 8. Punched products produced according to the process according to Claim 7.
